Programming: C#, JavaScript, Python, SQL

Web: HTML5, CSS3, Bootstrap, WordPress

API and Data: REST API, JSON, databases

Design: UI/UX design

Apps/Games: Flutter, Unity

Tools: Git, GitHub

PROFILE

Recent graduate with a bachelor's degree in **Multimedia Technology and Design** from the University of Agder, with an interest in **ICT, IT support, user support, and the development of digital solutions**. Through my studies, I have gained technical skills in areas including programming, web development, databases, APIs, and UI/UX design, as well as experience with testing and technical problem-solving.

I have basic knowledge of Microsoft 365 and would like to further develop my skills in Microsoft services, IT operations, and user support. I am also interested in learning more about Azure, cloud services, and other technologies used in modern IT environments.

As a recent graduate, I am eager to learn and curious, and I enjoy learning new systems, solving technical challenges, and helping users with digital issues.

EDUCATION

Bachelor in Multimedia Technology and Design | Aug. 2023 – Jun. 2026

University of Agder, Grimstad

Interdisciplinary technology degree with broad ICT competence and practical work in programming, web and application development, UI/UX design, and digital solutions. The programme also covers graphic design, photography, video, audio, animation, and 3D, with a focus on combining technology, design, and usability in the development of complete multimedia solutions.

General Studies Supplement | Aug. 2016 – Jun. 2017

Sam Eyde Upper Secondary School, Arendal

INTERESTS

IT and Technology
IT Support and User Support
Programming
Web Development
Game Development

PROJECT

Educational 2D Game | Returkraft – Bachelor Project

Developed an educational 2D game in Unity in collaboration with Returkraft, with the aim of teaching lower secondary school students about waste sorting and recycling. The work included programming, game logic, UI/UX design, and developing functionality using objects, components, and scripts in Unity. The game includes drag-and-drop functionality, a scoring system, timer, and leaderboard.

Through the project, we gained practical experience with game development, testing, troubleshooting, and technical problem-solving. The game was tested both during development and by young people in the target group, and the solution was further developed based on testing and feedback from Returkraft. The project also provided experience in learning Unity as a new development tool and developing a solution from idea to finished product.

DRIVING LICENCE

Class B and AM

WORK EXPERIENCE

Warehouse Assistant | Ølbrygging og Bema, Grimstad | May 2024 – Aug. 2026

Warehouse and logistics tasks, including picking, packing, and handling goods, with a focus on efficiency, accuracy, organisation, and teamwork.

Cook | MYRENE PIZZA INVEST AS, Arendal | Mar. 2021 – Mar. 2024

Food preparation, customer service, and daily operations in a fast-paced work environment. The work required good teamwork, effective problem-solving, and the ability to handle multiple tasks at the same time.

Support Contact | Respite Care Home in Åmli | Jun. 2014 – Aug. 2020

Follow-up and support for a service user, including night-shift work. The work involved handling different situations safely and independently, adapting the support to the user’s needs, and contributing to an active and meaningful daily life. The position required responsibility, patience, good communication, and reliability.

Carpenter (Summer Job) | Åmli Bygg | 2012 – 2022

Various construction tasks with a focus on teamwork, problem-solving, accuracy, and quality.
